Solar Skies Mfg., LLC Taps Into a Free Energy Source for Homes and Businesses

Starbuck, MN – Solar Skies Mfg., LLC, a leading manufacturer of solar thermal heating collectors, uses highly efficient copper absorber and tube assembly, along with a unique welding technique within their insulated solar collectors. For additional durability and efficiency, a revolutionary solar selective coating is used on all Solar Skies collectors.

Solar Skies' advanced technology effectively captures the sun's energy to heat water for either household or commercial use. These easy-to-install solar panels can provide up to 75% of the typical household's annual hot water needs, while decreasing CO² gasses that pollute our air.

Solar Skies markets their SRCC rated collectors through a dealer and distributor network throughout the United States and is currently expanding into Canada. The company also offers a 10-year warranty on the collectors as well as a 30-year weld warranty on the copper tube/fin. The company also offers comprehensive solar thermal training for their customers and information on federal, state, utility, and local tax incentives and rebates currently available

Solar Skies, Mfg., LLC offers multiple series of solar thermal collectors in a wide range of sizes. For more information, contact Solar Skies at 800 Industrial Park, Hwy 28 W., Starbuck, MN 56381; Telephone: 320-239-4805, Email: deb@solarskies.com or visit www.solarskies.com.
